

POWER **to GROW**

*A Blueprint
For Texas' Bright Future*

Entergy is Committed to Texas.

Serving more than 440,000 customers across 27 counties, we are proud of the investments we're making to meet the rising needs of our customers. As we grow with the state, **Entergy Texas plans to invest nearly \$1.6 billion by 2019** to build new infrastructure and update the existing power grid.

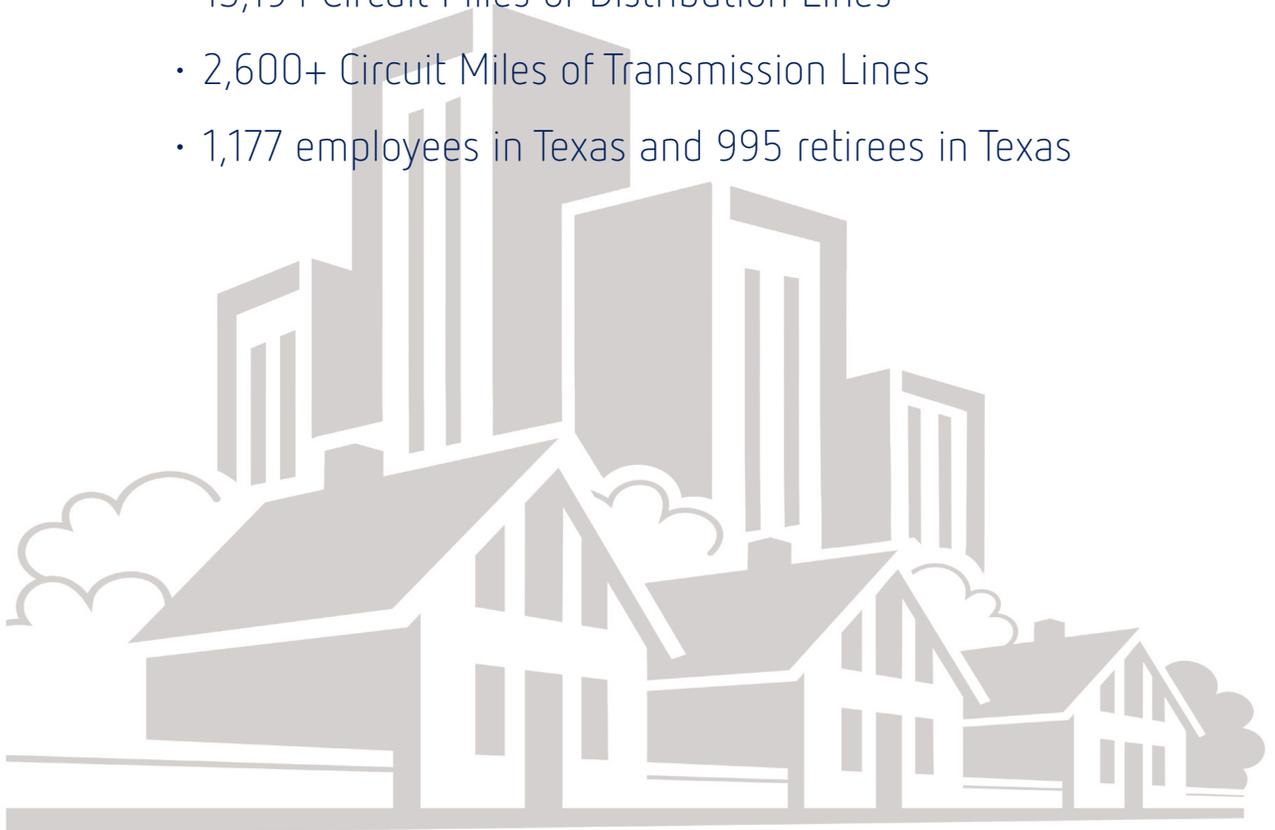

From the sandy shores of the Bolivar Peninsula to the Piney Woods of East Texas, Entergy Texas is committed to providing reliable, affordable electricity to our customers. Our region includes booming residential communities and the largest industrial complexes in Texas, including ExxonMobil, Valero, Motiva, Total Petrochemicals, BASF Chemical, Chevron Phillips and Dow. By powering our customers, we are powering the Texas economy.

Entergy Texas customers enjoy rates well below regional and national averages. Additionally, we joined the Midcontinent Independent System Operator (MISO), which gives us access to a larger power market to serve our customers. **This has saved Entergy Texas customers an estimated \$29 million** since joining.

About Us

- Rates 30% lower than the national average*
- 13,194 Circuit Miles of Distribution Lines
- 2,600+ Circuit Miles of Transmission Lines
- 1,177 employees in Texas and 995 retirees in Texas

* All customer classes, comparison made using EIA data, rolling 12-month average from 12/15-11/16.

Investing in Texas.

A fast-growing economy requires a reliable electric grid to power that growth.

That is why we have embarked on an aggressive modernization of our transmission and distribution systems, along with a new power generation facility. **This investment will position our region for continued economic growth.**

Transmission Investment: To build the superhighway of the grid, we have to invest in new transmission to provide access to low-cost power and a reliable system. Entergy is adding around 200 miles of new transmission lines and 15 new substations over the next 10 years.

Generation Investment: Powering a growing economy requires investing in new generation to keep the lights on. Entergy Texas has proposed the Montgomery County Power Station that will provide clean, reliable power to the region. The construction of this project will result in thousands of jobs with nearly \$1 billion in total economic activity in Texas.

Our planned capital investment for 2017-2019 includes:

Transmission
\$475M

Distribution
\$415M

Generation
\$630M

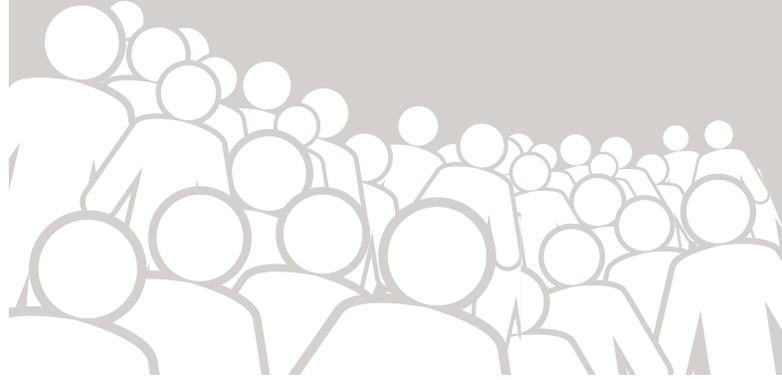

Other
\$50M

Total Capital Investment
\$1.57B

Growing Our Communities.

Entergy Texas isn't just a service provider. We live and work in the communities we serve, and community is at the heart of everything we do. That's why we look to do more than just provide reliable electricity.

Economic Development: Businesses can't thrive without reliable electricity. That's why Entergy Texas' Business and Economic Development team works tirelessly with our local, regional and state partners to provide resources and critical services to help new and existing businesses thrive in Texas. **Since 2013, we have supported projects that have created thousands of jobs in Southeast Texas.**

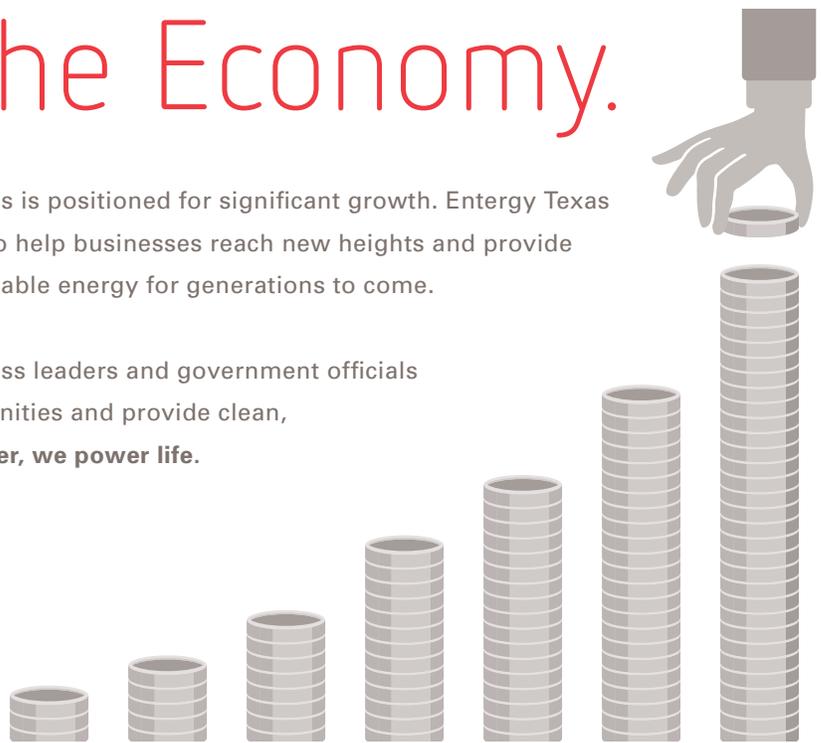

Workforce Development: Growing communities requires thinking about the next generation. That's why Entergy Texas is committed to developing the workforce of tomorrow. Entergy Texas has committed to giving **\$500,000 to schools and colleges across the region over the next five years.**

Giving Back: Entergy Texas employees are highly engaged in their local communities and understand that sometimes providing power means lending a hand. In 2015, we logged **almost 11,000 community service hours valued at nearly \$260,000.** That same year, Entergy Texas donated \$877,000 to 100 nonprofit organizations.

Boosting the Economy.

The Future is NOW. Texas is positioned for significant growth. Entergy Texas is investing to power this growth. We want to help businesses reach new heights and provide our customers with clean, reliable and affordable energy for generations to come.

We're working with our communities, business leaders and government officials to help stimulate the economy, build communities and provide clean, affordable energy to every customer. **Together, we power life.**
